Subject: Ongoing Sewage Spills in Tega Cay...

The spills of sewage into Lake Wylie continue to happen in Tega Cay. The Commission, Staff and DHEC seem to be blind to the fact that this continues to occur. If I am wrong please let me know what actions you have taken to help eliminate this ongoing issue. The most recent spill was on 5 May 2013 at Lift Station 3 and Waste Water Treatment Plant #2. I am not an engineer but it seems that either the pumps are too small, the pipes are too small, or the overall system is incapable of handling the load. Whatever the problem, it needs to be fixed. The commission just granted TCWS a huge rate increase so money can't be the issue. It seems that TCWS does not have the will to make the improvements and you don't have the will to force them. Does everyone now find it acceptable to conduct business in the same manner as Congress?
